ELSEVIER

Bone Vol. 28, No. 6
June 2001:665–670

SUBJECT INDEX
Bone, Volume 28, 2001

Acid phosphatase
Bone marker nomenclature recommendations and, 575
Adenosine triphosphate
Bone remodeling and, 507
Adolescents
Bone density and bone size evaluation, peripheral quantitative computed tomography, 227
Age
Bone mineral density analysis by quantitative ultrasound and, 118
Aging
Bone loss related to, male and premenopausal female primate model, 295
Alcoholism
Bone loss and fractures, nuclear factor-κB and, 167
Alkaline phosphatase
Bone marker nomenclature recommendations and, 575
Extracellular matrix protein 1 gene effects on, 14
Androgen
Bone maturation acceleration, Faslodex effects, 410
Angiogenesis
Vascular endothelial growth factor role in bone growth and, 65
Angiopoietin
Bone growth and, 65
Anisotropy
Trabecular architecture in growing bone, bone volume fraction increase effects, 650
Antiresorptive therapy
Dual-energy x-ray absorptiometry inaccuracies of BMD effects on osteopenia/osteoporosis evaluation, 548
Estrogen and gonadotropin-releasing hormone effects on bone turnover and, cynomolgus monkeys, 532
Apoptosis
Chondrocyte, mediation by phosphate ions, 1
Osteoblasts, cortisol inhibition of, 484
Osteoclasts, bisphosphonate effects on, in osteosclerosis, 609
Archeology
Bone mineral density in medieval women, multiparity and, 454
Arthritis
Collagen-induced, ovariectomy and estrogen replacement therapy effects in, 632
Collagen-induced, tibial/vertebral bone mass changes and, 87
Matrix metalloproteinase-13 mRNA level in synovial cells, mechanical loading effects, 399
Asthma
Cyclosporine A-induced bone loss and, transforming growth factor-β effects, 593

Biomechanics
Nonenzymatic glycation influence on cortical bone, 195
Biomineralization
Gap-junctional communication effects on osteoblast cell maturation, 362
Biosynthesis
Cathepsin K, in osteoclasts, 282
Bisphosphonates
Bone turnover suppression by, microdamage accumulation and, 524
Caspase-3 activity and, visualization in apoptotic osteoclasts, 465
Osteoclasts effects, in osteosclerosis, 609
Body composition
Insulin-like growth factor-1 and leptin influence on bone mass and, postmenopausal women, 113
Bone
Bone-derived neurotrophic factor gene and protein expression in, 404
Cathepsin K biosynthesis and processing, 282
Fracture healing, osteoporosis effects on, rats, 80
Giant cell tumors of, osteoprotegerin inhibition of bone resorption/osteoclast formation in, 370
Paget's disease of, RANK and OPG gene role, 104
Serine-485-to-alanine mutation in parathyroid hormone receptor and, 182
Strontium incorporation and distribution in, 446
Bone collagen
Nonenzymatic glycation influence on, 195
Bone development
Insulin-like growth factor-1 and leptin influence on, 113
Vascular endothelial growth factor inhibition of, 65
Bone formation
Basic fibroblast growth factor levels at fatty marrow sites and, 220
Bone morphogenetic protein-2-induced, pentoxifylline enhancement of, 290
Cortisol inhibition of osteoblast differentiation and apoptosis and, 484
Ectopic, bone morphogenetic protein-2 effects, 499
Glucose effects on, 21
Inorganic phosphate transporters and, 160
Bone growth
Architectural adaptation, bone volume fraction increase and, 650
Vascular endothelial growth factor inhibition of, 65
Bone healing
Femur, metaphyseal defect model for study of, 423
Bone histomorphometry
Type II errors in research studies, avoidance of, 556
Bone inflammation
Hyperphosphatemic tumoral calcinosis, vertebral involvement in, 316
Bone loss
Age-related, male and premenopausal female primate model, 295
Cyclosporine A-induced, transforming growth factor-β effects, 593
Ethanol-mediated, nuclear factor-κB role in, 167
Menopause and, long-term prospective study, 327
Osteoclast size relation to, 187
Bone markers
Standard nomenclature for, 575
Bone marrow
Fatty sites, basic fibroblast growth factor levels at, ovariectomized rats, 220
Bone mass
Changes, collagen-induced arthritis and, 87
Insulin-like growth factor-1 and leptin influence, postmenopausal women, 113
Parathyroid hormone effects on, rabbits, 538
Vertebral body, parathyroid hormone maintenance of, ovariectomized rats, 414
Bone mass density
Exercise duration as regulator of, 128
Bone maturation
Androgen-accelerated, Faslodex effects, 410
Bone metabolism
Coffee consumption effects on, 332

8756-3282/01/$20.00

Bone Vol. 28, No. 6
June 2001:665–670

Bone mineral density (BMD)
After total gastrectomy, 123
Botulism toxin-related loss, x-ray analysis, 72
Changes after stroke, 655
Collagen-induced arthritis effects on bone mass, 87
Dual-energy x-ray absorptiometry analysis, comparison with quantitative ultrasound, 118
Dual-energy x-ray absorptiometry inaccuracies effects on osteopenia/osteoporosis evaluation, 548
Hormone replacement therapy targeting after menopause, 440
In medieval women, multiparity and, 454
Menopause and, long-term prospective study, 327
Ovariectomy and estrogen replacement therapy effects, rats, 634
Peripheral quantitative computed tomography analysis, children and adolescents, 227
Predictive value of peripheral quantitative computed tomography, 133
Bone mineral metabolism
After total gastrectomy, 123
Bone mineralization
Chondrocyte-mediated, homocysteine effects on, 387
Long-term parathyroid hormone treatment effects, 237
Strontium distribution and, 446
Bone morphogenetic protein-2
Bone formation induced by, pentoxifylline enhancement of, 290
Osteoblastic differentiation of C2C12 cells, 491
Skeletal muscle-derived cell fate effects, 499
Bone quality
Vertebral cancellous bone, density and structure patterns of, 563
Bone remodeling
Extracellular nucleotide signaling role in activation, 507
Parathyroid hormone effects on, rabbits, 538
Bone resorption
Macrophage-colony stimulating factor effects on, 261
Osteoclast size relation to, 187
Osteoclastic, IL-17 effects on, 378
Osteoprotegerin inhibition of in giant cell tumors of bone, 370
Src role in, 54
Bone sialoprotein
Bone marker nomenclature recommendations and, 575
Bone size
Peripheral quantitative computed tomography analysis, children and adolescents, 227
Bone strength
Peripheral quantitative computed tomography predictive value, 133
Vertebral body, parathyroid hormone maintenance of, ovariectomized rats, 414
Bone structure
Long-term parathyroid hormone treatment effects, 237
Bone tissue
Prostaglandin E expression in, rats, 275
Bone turnover
Bisphosphonate-induced suppression, microdamage accumulation and, canines, 524
Extracellular nucleotide signaling role in activation, 507
Gonadotropin-releasing hormone and estrogen effects, cynomolgus monkeys, 532
Long-term parathyroid hormone treatment effects, 237
Bone volume
Parathyroid hormone effects, 150
Botulism
Bone mineral density loss and, x-ray analysis, 72

Calcinosis
Hyperphosphatemic tumoral, vertebral involvement in, 316
Calcium
Coffee consumption effects on bone metabolism and, 332
Calcium deposition
Osteoblastic, glucose effects on, 21
Calvaria
Developing, osteoblast expression of gene repertoires in, 351
Cancellous bone
Strength of, peripheral quantitative computed tomography predictive value, 133
Vertebral, density and structure patterns of, 563
Volume of, parathyroid hormone effects, 150
Cartilage
Bone-derived neurotrophic factor gene and protein expression in, 404
Replacement, vascular endothelial growth factor inhibition and, 65
Caspase-3
Bisphosphonate-induced activity, visualization in apoptotic osteoclasts, 465
Cathepsin K
Biosynthesis and processing in osteoclasts, 282
Children
Bone density and bone size evaluation, peripheral quantitative computed tomography, 227
Chondrocytes
Apoptosis of, mediation by phosphate ions, 1
Bone-derived neurotrophic factor gene and protein expression in bone and cartilage, 404
Clodronate
Vertebral fracture risk in osteoporosis and, 1-year analysis, 310
Clostridium botulinum
Osteoporosis related to, x-ray analysis, 72
Coffee consumption
Bone metabolism effects, 332
Collagen
Arthritis induced by, tibial/vertebral bone mass changes and, 87
Type I, bone marker nomenclature recommendations and, 575
Type II, breakdown of, zoledronate effects in Paget's disease, 461
Computed tomography, peripheral quantitative
Bone density and bone size analysis, children and adolescents, 227
Bone healing studies, 423
Bone mineral density predictive value, 133
Growth hormone/parathyroid hormone effects on bone loss, 202
Confocal laser scanning microscopy
Osteocytes process distribution analysis, 145
Cortical bone
Biomechanical properties of, nonenzymatic glycation influence on, 195
Maintenance of, parathyroid hormone-treated ovariectomized rats, 251
Mechanical properties, parathyroid hormone effects on, rabbits, 538
Reperfusion of, crush injury ischemia duration and, 94
Cortisol
Osteoblast differentiation and apoptosis inhibition and, 484
Crush injury
Bone, ischemia duration effects on reperfusion in cortical bone, 94
Cyclosporine A
Bone loss induced by, transforming growth factor-β effects, 593
Cytokines
Coffee consumption effects on bone metabolism and, 332

Deoxypyridinoline
Bone marker nomenclature recommendations and, 575
Coffee consumption effects on bone metabolism and, 332
Differential interference contrast microscopy
Osteocytes process distribution analysis, 145

DT-diaphorase
Expression and activity in osteoblastic cells, 9
Dual-energy x-ray absorptiometry
Age-related bone loss, male and premenopausal female primate model, 295

Embryo
Metatarsals, extracellular matrix protein 1 gene effects on, 14
Endothelin
Prostaglandin release and, 595
Enzyme-linked immunosorbent assay
Vitamin D receptor measurement, 319
Epinephrine
Inorganic phosphate transport and, 589
17β-Estradiol
Cortical bone maintenance after ovariectomy and, rats, 251
Estrogen
Bone turnover effects, cynomolgus monkeys, 532
Phenol sulfotransferases in osteoblasts and osteosarcoma and, 617
Estrogen deficiency
Osteoporosis effects on fracture healing and, rats, 80
Estrogen replacement therapy
Arthritis and bone mineral density effects after, rats, 634
Ethanol
Bone loss mediated by, nuclear factor-κB role in, 167
Exercise
Duration of, bone mass density regulation and, 128
Extracellular matrix
Bone marrow stromal cells and, integrin-mediated interactions, 174
Mineralization of, parathyroid hormone role, gap-junctional intercellular communication and, 38
Extracellular matrix protein 1 gene
Alkaline phosphatase activity and mineralization effects, 14

Faslodex
Androgen-accelerated bone maturation and, 410
Fat mass
Changes after stroke, 655
Femoral neck
Fracture, osteoporosis effects on, rats, 80
Fibroblast growth factor, basic
Levels at fatty marrow sites, ovariectomized rats, 220
Fracture
Fragility, bone mineral density analysis by quantitative ultrasound, 118
Healing, osteoporosis effects in early period, rats, 80
Hormone replacement therapy targeting after menopause, 440
Vertebral, risk in osteoporosis, clodronate effects, 310
Fracture healing
Insulin-like growth factor-1/transforming growth factor-β1 effects on, rats, 341
Peripheral quantitative computed tomography for study of, 423

β-Galactosidase
Bone morphogenetic protein-2 effects on muscle regeneration and, 499
Gap-junctional communication
Osteoblast cell maturation and, 362
Gastrectomy
Bone mineral density after, 123
Gender
Bone mineral density analysis by quantitative ultrasound and, 118
Genetic studies
Paget's disease of bone, RANK and OPG gene role, 104
Glucocorticoids
Osteoblast differentiation and apoptosis inhibition and, 484
Glucose
Bone formation and osteoblast maturation effects, 21
Glycation
Nonenzymatic, cortical bone biomechanical properties and, 195
Gonadotropin-releasing hormone
Bone turnover effects, cynomolgus monkeys, 532
Granulocyte macrophage-colony stimulating factor
Osteoclast formation and, 261
Growth hormone
Lumbar vertebral bone effects, osteopenic rats, 202

Histomorphometry
Bone, type II errors in research studies, avoidance of, 556
Collagen-induced arthritis effects on bone mass, 87
History
Bone mineral density in medieval women, 454
Homocysteine
Chondrocyte-mediated bone mineralization effects, 387
Hormone replacement therapy
Targeting after menopause, 440
Hydroxylysine
Bone marker nomenclature recommendations and, 575
Hydroxyproline
Bone marker nomenclature recommendations and, 575
Hypercoagulability
Lipopolysaccharide-induced osteonecrosis and, rabbits, 641
Hyperphosphatemic tumoral calcinosis
Vertebral involvement in, 316
Hypophosphatemia
Oncogenic osteomalacia and, 430

Immunohistochemistry
Bone-derived neurotrophic factor gene and protein expression in bone and cartilage, 404
Indomethacin
Osteoclast inhibition role, osteoprotegerin effects, 208
Inflammatory bowel disease
Cyclosporine A-induced bone loss and, transforming growth factor-β effects, 593
Insulin-like growth factor-1
Bone mass effects, postmenopausal women, 113
Fracture healing effects, rats, 341
Integrin
Bone marrow stromal cells and extracellular matrix interactions, 174
Interleukin-1
Osteoclast formation and, 261
Interleukin-3
Osteoclast formation and, 261
Interleukin-6
Stimulation of, in osteoblasts, 268
TNF-α induction, p38 mitogen-activated protein kinase effects, 45
Interleukin-13
Proliferation in osteoblasts and, 268
Interleukin-17
Nitric oxide production and bone resorption effects, 378
Ion channels
Osteocytes effects on mineral homeostasis and mechanotransduction and, 29
Ischemia
Crush injury, duration of, reperfusion in cortical bone and, 94

Lamellar thickness
Osteocyte lacunae and, in secondary osteons, 215
Leptin
Bone mass effects, postmenopausal women, 113
Limb ischemia
Duration, cortical bone reperfusion and, 94
Lipopolysaccharide
Osteonecrosis induced by, rabbits, 641
Lumbar vertebra
Bone loss associated with ovariectomy, growth hormone/parathyroid hormone effects on, 202
Strength, after bilateral ovariectomy, trabecular bone contour effects, 625

Macrophage-colony stimulating factor
Osteoclast formation and, 261
Matrix metalloproteinase
mRNA levels in rheumatoid arthritis, 303

Bone Vol. 28, No. 6
June 2001:665–670

Matrix metalloproteinase-13
mRNA level in synovial cells, mechanical loading effects, 399
Mechanical loading
Matrix metalloproteinase-13 mRNA level in synovial cells and, 399
Mechanical properties
Cortical bone, nonenzymatic glycation influence on, 195
Mechanotransduction
Osteocytes effects, ion channels and, 29
Menopause
Bone loss and, long-term prospective study, 327
Hormone replacement therapy targeting after, 440
Mesenchymal cell micro-mass cultures
Homocysteine effects on chondrocyte-mediated bone mineralization and, 387
Metatarsals
Embryonic, extracellular matrix protein 1 gene effects on, 14
Microdamage accumulation
Bisphosphonate-induced suppression of bone turnover and, 524
Microscopy
Confocal laser scanning and differential interference contrast, osteocytes process distribution analysis, 145
Mineral homeostasis
Osteocytes effects, ion channels and, 29
Mineralization
Extracellular matrix, parathyroid hormone role, gap-junctional intercellular communication and, 38
Extracellular matrix protein 1 gene effects on, 14
Mitogen-activated protein kinase
Osteoblast differentiation of C2C12 cells, bone morphogenetic protein-2 effects, 491
Multiparity
Bone mineral density in medieval women, 454
Muscle mass
Changes after stroke, 655
Muscle regeneration
Bone morphogenetic protein-2 effects on muscle-derived cells, 499
Muscle-derived cells
Bone morphogenetic protein-2 effects on, 499

NAD(P)H:quinone oxidoreductase
Expression and activity in osteoblastic cells, 9
Nephrotic syndrome
Cyclosporine A-induced bone loss and, transforming growth factor-β effects, 593
Neurotrophic factor
Bone-derived, gene and protein expression in bone and cartilage, 404
Nicotine
Cellular level effects, postmenopausal osteoporosis and, 603
Nitric oxide production
IL-17 effects on, 378
Nuclear factor-κB
Bone loss in alcoholics and, 167
Tumor necrosis factor-α and, stromal cell depletion in bone marrow and, 474

Oncogenic osteomalacia
Phosphate wasting in, 430
OPG gene
Paget's disease of bone and, 104
Ossification
Endochondrial, vascular endothelial growth factor inhibition of, 65
Osteoblasts
In developing calvaria, gene expression and, 351
Differentiation, C2C12 cells, bone morphogenetic protein-2 effects, 491
Differentiation and apoptosis of, cortisol inhibition of, 484
Differentiation of, inorganic phosphate transport and, 160
IL-13 and IL-4 inhibition of proliferation in, 268
Inorganic phosphate transporters and, 160
Maturation, glucose effects on, 21
Maturation of, gap-junctional communication and, 362
NAD(P)H:quinone oxidoreductase expression and activity in, 9
Parathyroid hormone-stimulated mineralization in, gap-junctional intercellular communication and, 38
Phenol sulfotransferases in, 617
Prostaglandin E expression in, rats, 275
Osteocalcin
Bone marker nomenclature recommendations and, 575
Coffee consumption effects on bone metabolism and, 332
Osteoclasts
Apoptotic, bisphosphonate-induced activity caspase-3 and, 465
Cathepsin K biosynthesis and processing in, 282
Coffee consumption effects on bone metabolism and, 332
Formation, macrophage-colony stimulating factor and humoral factors effects on, 261
Formation, osteoprotegerin inhibition of in giant cell tumors of bone, 370
Inhibition by indomethacin, osteoprotegerin effects, 208
Maturation/function, malignant osteopetrosis and, 513
Peripheral blood hematopoietic precursors and, transforming growth factor-β1 stimulation of, 577
Resorption, Src activity inhibition and, 54
Size of, relation to bone resorption efficiency, 187
Osteocyte lacunae
Lamellar thickness and, in secondary osteons, 215
Osteocytes
Mineral homeostasis and mechanotransduction, ion channels role, 29
Processes of, confocal laser scanning and differential interference contrast microscopy analysis, 145
Osteogenesis
Endothelin and sarafotoxin effects on prostaglandin release and, 595
Osteomalacia
Oncogenic, phosphate wasting in, 430
Osteonecrosis
Lipopolysaccharide-induced, rabbits, 641
Osteons
Osteocyte lacunar size-lamellar thickness relations in, 215
Osteopenia
Dual-energy x-ray absorptiometry inaccuracies of BMD effects evaluation of, 548
Glucose effects on bone formation and, 21
Lumbar vertebral bone, growth hormone/parathyroid hormone effects, 202
Osteopetrosis
Malignant, osteoclast maturation and function and, 513
Src role in bone resorption, 54
Osteoporosis
After stroke, 1-year prospective study, 655
Disuse, botulism toxin-related, x-ray analysis, 72
Dual-energy x-ray absorptiometry inaccuracies of BMD effects evaluation of, 548
Fracture healing effects, rats, 80
High-dose risedronate safety, postmenopausal women, 108
Menopause and, long-term prospective study, 327
Postmenopausal
parathyroid hormone treatment effects, 150
smoking effects at cellular level and, 603
Serine-485-to-alanine mutation in parathyroid hormone receptor and, 182
Strontium distribution in bone and, 446
Total gastrectomy and, 123

Vertebral cancellous bone, density and structure patterns of, 563
Vertebral fracture risk in, clodronate effects, 310
Osteoprotegerin
Bone resorption/osteoclast formation inhibition, in giant cell tumors of bone, 370
Indomethacin-induced osteoclast inhibition and, 208
Osteoprotegerin gene
Paget's disease of bone and, 104
Osteosarcoma
Phenol sulfotransferases in, 617
Osteosclerosis
Bisphosphonate effects on osteoclasts in, 609
Ovariectomy
Arthritis and bone mineral density effects after, rats, 634
Basic fibroblast growth factor levels at fatty marrow sites and, 220
Bilateral, trabecular bone contour effects on lumbar vertebra strength after, 625
Bone loss associated with, growth hormone/parathyroid hormone effects on, 202

P38 mitogen-activated protein kinase
Tumor necrosis factor-α induction of interleukin-6 and, 45
Paget's disease of bone
RANK and OPG genes role in, 104
Zoledronate effects on type II collagen breakdown, 461
Parathyroid hormone
Bone mass, remodeling and cortical bone mechanical properties, rabbits, 538
Bone remodeling and, 507
Cortical bone maintenance after ovariectomy, rats, 251
Extracellular matrix mineralization, gap-junctional intercellular communication and, 38
Long-term treatment, bone structure/mineralization effects, 237
Lumbar vertebral bone effects, osteopenic rats, 202
Postmenopausal osteoporosis effects, 150
Vertebral body bone mass maintenance, ovariectomized rats, 414
Parathyroid hormone receptor
Serine-485-to-alanine mutation in, 182
Pentoxifylline
Bone formation induced by bone morphogenetic protein-2 and, 290
Peripheral blood hematopoietic precursors
Osteoclast-forming potential of, transforming growth factor-β1 stimulation of, 577
Phenol sulfotransferases
In osteoblasts and osteosarcoma, 617
Phosphate
Wasting, in oncogenic osteomalacia, 430
Phosphate, inorganic
Transport
epinephrine effects, 589
osteoblast differentiation and, 160
Phosphate ions
Chondrocyte apoptosis mediation and, 1
Polymorphism
Paget's disease of bone, RANK and OPG gene role in, 104
Proliferation
DT-diaphorase expression and activity in osteoblastic cells and, 9
Prostaglandin
Osteoclast inhibition by indomethacin and, 208
Prostaglandin E
Expression in osteoblasts and bone tissue, rats, 275
Prostaglandin release
Endothelin and sarafotoxin effects, 595
Protein tyrosine kinase
Ethanol-mediated bone loss and, 167
Pyridinoline
Bone marker nomenclature recommendations and, 575

Quiescence
DT-diaphorase expression and activity in osteoblastic cells and, 9

Radius
Size of, peripheral quantitative computed tomography analysis, children and adolescents, 227
RANK gene
Paget's disease of bone and, 104
Reperfusion injury
In cortical bone, crush injury ischemia duration and, 94
Research
Bone histomorphometry, type II errors in research studies, avoidance of, 556
Rheumatoid arthritis
Bone mass changes induced by, 87
Cyclosporine A-induced bone loss and, transforming growth factor-β effects, 593
Matrix metalloproteinase, metalloproteinase tissue inhibitors, and transcription factor mRNA levels in, 303
Risedronate
Cortical bone maintenance after ovariectomy and, rats, 251
High-dosage, safety, in postmenopausal women, 108

Sarafotoxin
Prostaglandin release and, 595
Serine-485-to-alanine mutation
In parathyroid hormone receptor, 182
SH2 domain
Src activity inhibition and osteoclast resorption, 54
Skeletal tissue
Nicotine effects at cellular level, 603
Smoking
Cellular level effects, postmenopausal osteoporosis and, 603
Src activity
Inhibition, osteoclast resorption and, 54
Stroke
Muscle mass, fat mass, and bone mineral density after, 655
Stromal cells
Depletion in bone marrow, TNF-α and NF-κB and, 474
Development, interaction with extracellular matrix, 174
Strontium
Bone distribution of, 446
Sulfation
Phenol sulfotransferases in osteoblasts and osteosarcoma and, 617
Sulfotransferase
In osteoblasts and osteosarcoma, 617
Synovial cells
Matrix metalloproteinase-13 mRNA level in, mechanical loading effects, 399

Telopeptides
Bone marker nomenclature recommendations and, 575
Texture analysis
Botulism toxin-related osteoporosis and, x-ray analysis, 72
Thyroid hormones
Phenol sulfotransferases in osteoblasts and osteosarcoma and, 617
Trabecular architecture
Growing bone and, bone volume fraction increase effects, 650
Trabecular bone
Contour, lumbar vertebra strength after bilateral ovariectomy and, 625
Transcription factor
mRNA levels in rheumatoid arthritis and, 303
Transforming growth factor-β
Cyclosporine A-induced bone loss and, 593
Transforming growth factor-β1
Fracture healing effects, rats, 341
Stimulation of osteoclast-forming potential of peripheral blood hematopoietic precursors, 577
Transplantation
Bone loss after, transforming growth factor-β effects, 593
Tumor
Giant cell, of bone, osteoprotegerin inhibition of bone resorption/osteoclast formation in, 370

Bone Vol. 28, No. 6
June 2001:665–670

Tumor necrosis factor-α
Interleukin-6 induction, p38 mitogen-activated protein kinase effects, 45
NF-κB and, stromal cell depletion in bone marrow and, 474
Osteoclast formation and, 261
Tumoral calcinosis
Hyperphosphatemic, vertebral involvement in, 316

Ultrasound, quantitative
Bone mineral density analysis, age, gender, and fragility fracture effects, 118
Exercise duration and bone mass regulation, 128

Vascular endothelial growth factor
Bone growth and, 65
Vertebra
Hyperphosphatemic tumoral calcinosis and, 316
Vitamin D receptor
Immunosorbent assay for measurement of, 319

Women, postmenopausal
Bone mass, insulin-like growth factor-1 and leptin influence on, 113
Osteoporosis and, long-term prospective study, 327
Osteoporotic, risedronate effects on parathyroid hormone levels and collagen excretion, 108

X-ray
Botulism toxin-related osteoporosis analysis, 72

Zoledronate
Type II collagen breakdown in Paget's disease of bone, 461
